

Certolizumab Pegol (Cimzia®) Injection Price Quote

About Cimzia®

Cimzia® is an anti-inflammatory drug treatment which is administered by subcutaneous injection. Cimzia® injections may either be administered by a health care professional or as a self-injection by the patient after s/he receives injection training from a health care professional.

Indications for Use

Cimzia® is used to reduce the signs and symptoms of active moderate-to-severe Crohn's disease in adult patients who have not responded well to other therapies.

Billing

After you and your MNGI provider decide to begin Cimzia® treatment, MNGI will partner with you in enrolling in any financial assistance programs for which you may be eligible.

Listed below are the specific codes and fees for Cimzia® injections. One Cimzia® dose requires two separate injections, so you will see the administration fee billed in a quantity of two (2) on your statement. The administration fee is a separate component of the visit and is not included in the cost of the drug. If you obtain Cimzia® from a specialty pharmacy, only the administration fee will appear on your MNGI statement and you will receive a separate statement from the specialty pharmacy for Cimzia®.

The actual allowed amount (the amount of the billed charge deemed payable by an insurance plan) for each charge and the amount of your out-of-pocket expenses will depend on your particular insurance plan. Although CIMplicity can help you to determine insurance coverage for Cimzia® treatment, it is important to direct any additional questions you may have regarding coverage and your financial responsibility to your insurer prior to receiving treatment.

Billing Code (CPT Code)	Description	Charge Amount
J0717	Cimzia® (certolizumab pegol)	\$3,200
96372	Drug Administration	\$67
