

Liver Pathology Price Quote

Listed below are the technical/interpretation fees associated with liver pathology due to liver biopsy. While we cannot guarantee the exact dollar amount of your pathology, we hope this tool will serve as a guideline when contacting your insurance company to determine your benefits. We have included the CPT codes associated with liver pathology and special stains as a reference.

The final cost of the pathology cannot be determined until the pathologist has completed the examination of the biopsy specimen(s). If the pathologist determines that further testing on the specimen is required, special stains or immunochemistry could also be done.

Your liver pathology bill will be performed and billed by Hospital Pathology Associates (HPA). Insurance coverage for pathology varies amongst insurers. It is important to check your individual policy and direct any questions to your insurer to determine your coverage and your financial responsibility prior to receiving treatment.

Billing Code (CPT Code)	Description	Charge Amount
88307	Liver biopsy-- Technical component	\$905 (Each specimen)
88313	Special stains, group II— Technical component	\$309 (Each stain per specimen)
